PERSONAL PROJECTS

- **Food Recipe App** 2023
Developed a food recipe app with React, Tailwind CSS, React Router, and third-party API integration for diverse recipe displays.
 - Utilized React Hooks (useState, useEffect) for efficient state management, ensuring responsive design and cross-browser compatibility with Tailwind CSS for enhancing user experience on different devices.
 - Integrated search and filtering features to help users easily discover recipes based on ingredients, cuisine, or dietary preferences, enhancing usability and engagement.
- **My portfolio** 2023
A responsive portfolio built with HTML, CSS, JavaScript, and Tailwind CSS.
 - Tools & technologies used: HTML, CSS, JavaScript, React, Tailwind
 - I developed a responsive portfolio website using HTML, CSS, and JavaScript, styled with Tailwind CSS. The project highlights my technical skills and creativity, offering seamless navigation and adaptive design for all devices. It serves as a professional showcase of my work and projects, emphasizing performance, accessibility, and modern design principles.
- **Expense Tracker App** 2024
Developed an expense tracker app with React for tracking expenses, categorizing transactions, and analyzing spending.
 - • Leveraged Chakra UI to create a visually appealing and responsive user interface, ensuring consistency and accessibility across different devices. Chakra UI's component library facilitated streamlined design.
 - Implemented local storage support to retain user data across sessions, ensuring persistent expense records without requiring login or external databases.
